

INVITATION TO EXHIBIT

68th ARFTG CONFERENCE Broomfield, Colorado November 30th – December 1st, 2006

The Automatic RF Techniques Group will hold its 68th ARFTG Microwave Measurement Conference at the Omni Interlocken Resort in Broomfield, Colorado. The two-day conference technical theme is “*Measurement for Emerging Technologies*” and will also cover all aspects of microwave measurement.

During this conference there will be an exhibits area for the display of microwave measurement equipment, simulation tools, and associated products. On behalf of the Exhibits Committee I would like to extend an invitation to exhibit. This is an excellent opportunity to present your company’s latest products and techniques to an exceptionally qualified audience.

The exhibits area will be adjacent to the technical program hall, which will ensure exposure to all of the conference participants. This is a valuable opportunity to exhibit your products to a focused measurement community in the comfortable, personal atmosphere afforded by ARFTG.

The exhibitor application and rules document is attached. Please contact me if you have any questions about this opportunity. I hope that you will join us in Broomfield, Colorado.

Joe Tauritz, Chair
ARFTG Exhibits Committee
