

Dear All,

We are happy to announce the 4th NVNA Users' Forum, which will take place during IMS week in connection with the Spring ARFTG conference.

4th NVNA User's Forum [Schedule](#), [Location](#).

Based on your feedback, we propose a slightly different schedule as compared to the Fall meeting:

05 mins: Introductions

25 mins: Discussion topic 1

25 mins: Discussion topic 2

25 mins: Research updates from 5 groups

15 mins: Discussion of Ph.D. research in one area

25 mins: Demos, announcements, and open discussion

total: 2 hours

We intend to schedule two discussion topics in the same format as previous meetings. Next, we would like to offer the opportunity for short research updates ('5 min.') from 3 to 5 labs with new results. In order to hear from as many groups as possible, we will probably have to limit the number and frequency of these reports to at most one per year for every lab.

The next item on the agenda is new as well: To involve more young researchers in this Users' Forum, a PhD student is welcome to tell about his/her research problems in the nonlinear field and ask for help and suggestions by the 'older' (more experienced) researchers.

If you would like to bring a research update or suggest a discussion topic, contact the organizers: Dominique Schreurs <dominique.scheurs@esat.kuleuven.ac.be>, Wendy Van Moer <wendy.vanmoer@vub.ac.be>, or Kate Remley <remley@boulder.nist.gov>.

PhD students interested in receiving the help of the Users' Forum participants with their research questions and mysteries are welcome to contact Wendy <wendy.vanmoer@vub.ac.be>.

We are looking forward to your attendance!

Dominique, Wendy, and Kate
